## Human MMP3, C-His, Flag Tag Protein HA210853

Product name:	Human MMP3, C-His, Flag Tag								
Species reactivity:	Human								
Bio-Activity:	Testing in progress.								
Protein construction description:	A DNA sequence encoding the human MMP3 protein (P08254) (Tyr18-Cys 477) was expressed with both His, Flag tag at the C-terminus.								
Background:	Metalloproteinase with a rather broad substrate specificity that can degrade fibronectin, laminin, gelatins of type I, III, IV, and V; collagens III, IV, X, and IX, and cartilage proteoglycans. Activates different molecules including growth factors, plasminogen or other matrix metalloproteinases such as MMP9. Once released into the extracellular matrix (ECM), the inactive pro-enzyme is activated by the plasmin cascade signaling pathway. For example, in dopaminergic neurons, gets activated by the serine protease HTRA2 upon stress and plays a pivotal role in DA neuronal degeneration by mediating microglial activation and alpha-synuclein/SNCA deavage. In addition, plays a role in immune response and possesses antiviral activity against various viruses such as vesicular stomatitis virus, influenza A virus (H1N1) and human herpes virus 1. Mechanistically, translocates from the cytoplasm into the cell nucleus upon virus infection to influence NF-kappa-B activities.								
Purity:	>95% as determined by SDS-PAGE.								
Endotoxin:	Less than 1.0 EU per $\mu$ g by the LAL method.								
Fragment region:	MMP3 (18-477)								
Source:	HEK293								
Accession:	P08254								
Predicted molecular mass:	54.9 kD								
Formulation:	Lyophilized from a 0.2 $\mu m$ filtered solution of PBS, pH7.4, 5% Trehalose, 5% mannitol.								
Reconstitution:	Reconstitute at 250 µg/ml in sterile water.								
Storage:	Please avoid repeated freeze-thaw cycles. Samples are stable for up to twelve months from date of receipt at - $20^{\circ}$ C to - $80^{\circ}$ C It is recommended that aliquot the reconstituted solution to minimize freeze-thaw cycles.
